

SOLED

MAIN FEATURES

SOLED is an architectural sign application where a LED strip is integrated into the profiles that ensures the light is introduced in a glass or acrylic sheet from the side. This ensures that the image on the front of the sheet is lit up. The image can easily be added to the sheet using a film or it can be engraved into the sheet.

SOLED is a modular system where the customer can choose between a round, curved or square profile and where the signs can be wall mounted, suspended or flag mounted.
