

MODULE PLUS INDOOR

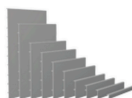

MAIN FEATURES

A classic product that continues to do the job perfectly! With the Module Plus Indoor, Cosign developed a modular sign system at the beginning of the 1990s that started a new trend within architectural signage and served as an inspiration for many of our colleagues. The Module Plus Indoor consists of a series of flat aluminium profiles in different widths that has a 15,5 mm and 31 mm module as the basic profiles. The profiles can be "clicked" into place in an easy manner on plastic end caps or clips to create door signs, pictograms, directories, etc. Single-sided signs for wall mounting and double-sided systems for hanging or flag mounting are possible. The Module Plus Indoor platform does not just offer the sign maker a simple, versatile and flexible standard solution, it also offers space to the creative sign maker to place his or her own emphasis and to develop customised products.
